Overall Satisfaction with Services

Program Satisfaction: Percent of responses to the question "How satisfied are you with the services you receive?"

Some of the key findings were:

- Overall, 81.3% of the individuals served by Comprehensive Psychiatric Services were "satisfied" or "very satisfied" with their services.
- The percent of individuals served in this region who rated themselves as "satisfied" or "very satisfied" was lower than the state average (80.2% for this region versus 81.3% for the state).
- The Non-CPRC consumers rated the program higher than other groups (83.3% with at least a "satisfied" rating).
- The lowest satisfaction was in the CPRC program, where 78.7% of those served gave a "satisfied" or "very satisfied" rating.

The first number represents a mean rating. Scale: 1=Not at all satisfied . . . 5=Very satisfied. The number in parentheses represents the number responding to this item.								

Some of the key findings were:

- The participants in the Comprehensive Psychiatric Services programs were satisfied with the services they received. All ratings were above a 4.00 ("satisfied"). The ratings of this region ranged from 4.11 to 4.33.
- The highest rated item was with respect of ethnic and cultural backgrounds (mean of 4.33).
- The lowest rated item was the content of the treatment plan (mean of 4.11).
- The Non-CPRC Adult participants were the most satisfied with services (mean rating of 4.42).

Some of the key findings were:

- The quality of life ratings were significantly below the ratings of Comprehensive Psychiatric Services and service ratings.
- The consumers in this region were most satisfied with how safe they feel in their home (mean of 3.95) and least satisfied with amount of choices they have in their lives (mean of 3.44).

CPS Comparison of Gender

A comparison was made between the male and female consumers in the satisfaction survey items. Females were more satisfied with respect of ethnic and cultural backgrounds. Males were more satisfied with opportunities to make friends, their general health care, and what they do during their free time. (See Table I-1).

Table I-1

(d) Interaction between Black and Hispanic. (e) Interaction between Hispanic and Native American. (f) Interaction between Hispanic and Other.						

CPS Comparison of Age Groups

A comparison was made among three age categories: (1) youth under the age of 18 years; (2) young adults between 18 and 49 years of age; and (3) adults 50 years of age or older. There was only one significant item; the adults 50 years of age or older were most satisfied with where they live. (See Table I-3.)

(a) interaction between 18-49 Years and 50+ Years.				

CPS Comparison of Current Living Arrangements

A comparison was made of the satisfaction items based on the current living situation of the consumer. Those who lived independently were most satisfied with the staff, knowledge of the staff, confidentiality, and content of treatment plan. Consumers who lived with their biological parents were most satisfied with following the treatment plan. Consumers who lived in a residential treatment facility were most satisfied with respect of ethnic and cultural backgrounds and services received. (See Table I-4).

CPS Comparison Between Those Who Lived and Did Not Live in Residential Treatment Facilities

A comparison was made on the satisfaction with services based on whether the individual had lived in a residential treatment facility during the past year. Consumers that had not lived in a residential treatment facility were more satisfied with all significant items. (See Table I-5).

Table I-5

CPS Consumers - Comparison of Whether Lived in Residential Treatment Facility

CPS Comparison across Programs

A comparison was made across the different comprehensive psychiatric services programs. Non-CPRC consumers were most satisfied with the staff, knowledge of the staff, confidentiality, respect of ethnic and cultural backgrounds and services received. The CPRC consumers were most satisfied with the amount of choices in their lives, opportunities to make friends and their general health care. The Child/Adolescents were most satisfied with how they spend their day, and with what they do in their free time. (See Table I-6.)
